TOURBILLON

SEKONDA

SPECIFICATION

- Calibre HS 2233 Skeleton hand winding Tourbillon.
- 19 jewels.
- 35mm diameter with a thickness of 5mm.
- 40 hour power reserve.
- 2 hands with cage at 12 o'clock.
- Accuracy -10/+30 seconds per day.
- Frequency 28,800, amplitude 240-340.
- Sapphire crystal face glass.
- Mineral caseback glass.
- Diamond cut hands with Swiss Super luminous coating.
- 3 piece stainless steel case water resistant to 3 ATM.
- High density dust proof silicon strap which provides UV protection.

INSTRUCTIONS

- Action of hand winding is best done at night. The movement will save enough power to run and keep the watch functioning accurately for about 50 hours.
- Wind gently until the crown will no longer turn. It will then have reached maximum reserve. Please do not wind the crown too hard, as the mainspring will crack, rendering severe damage to the watch.
- The movement is a Skeleton Tourbillon. It is a complicated precision time device. It is not suitable for wearing in severe conditions or for participation in any intense exercise (such as tennis, soccer and golf etc.). Avoid direct impact from other objects e.g. metal bracelets.

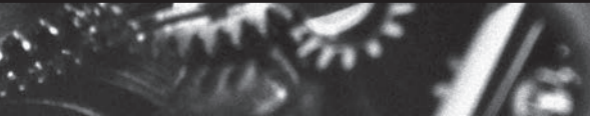

GUARANTEE

Your SEKONDA watch is guaranteed against defects in materials and workmanship for a period of **2 years** from the date of purchase. During this period, we will exchange or repair, at our discretion, any defective components.

Important - Not covered by Guarantee:

1) Straps. 2) Damage caused by accident, misuse or lack of care. 3) Water penetration caused by exceeding the stated water resistance. Do not operate the crown while in contact with water.

Service and repairs. Please return your watch, together with Proof of Purchase and a brief note to explain the fault to the address overleaf by Recorded Delivery. Do not send the presentation box as this will not be returned. This guarantee does not affect your statutory rights.
